

TIA QuEST Forum Sustainability Assessment Model

The TIA QuEST Forum’s Sustainability Assessment Model (Assessor) enables companies to self-assess and benchmark their sustainability and corporate social responsibility programs with industry best practices. The Assessor provides feedback and guidance to assist a company with optimizing their sustainability programs.

Registration to subscribe to the Assessor is found at: [Cost & Registration – Assessor \(tiaassessor.com\)](https://tiaassessor.com)

While use of the Assessor is not a TL 9000 requirement, it is one of the many ways in which an organization may choose to demonstrate conformance with the following requirement in the TL 9000 Handbook:

9.1.3.C.3. Sustainability Assessment - The organization should assess the status of its sustainability efforts as appropriate to its organization, products, and services.

9.1.3.C.3-NOTE A sample sustainability assessment model is available at tl9000.org.

The TIA QuEST Forum Sustainability Initiative team meets regularly to share best practices and advancement of the Assessor model. For more information on joining the TIA QuEST Forum Sustainability Initiative and using the Assessor please visit [Sustainability Working Group - TIA Online](#) or email SI@questforum.org
